

IMPORTANT SAFETY INFORMATION

I. Avoid Hearing Damage

WARNING: Permanent hearing loss may occur if earpieces are used at high volume. Set the volume on your two-way radio to a safe level. You can adapt over time to a higher volume of sound that may sound normal but can be damaging to your hearing. If you experience ringing in your ears or muffled speech, stop listening and have your hearing checked. The louder the volume, the less time is required before your hearing could be affected. Hearing experts suggest that to protect your hearing:

- Limit the amount of time you use the earpiece at high volume.
- Avoid turning up the two-way radio volume to block out noisy surroundings.
- Turn down the volume on the two-way radio if you can't hear people speaking near you.

II. Keep Out of Reach of Children

WARNING: The small parts included with this product can be a choking hazard. This product is not intended for use by children and should be kept away from children under 12 years of age.

CAUTION:

- Only use attachments and accessories specified by Earphone Connection, Inc.
- User assumes risk if they attempt to use EPC products with other brand/model products.
- Risk of explosion if product batteries are replaced by an incorrect type. With Lithium ion batteries, there is a risk of fire and burns.
- Do not force open, crush, heat above 60 degrees Celsius (140 degree Fahrenheit), or incinerate.
- For greater comfort and safety, start at the lowest volume when using any of our products.

* Please Note

Earphone Connection, Inc. products are designed to produce a specific audio output level at maximum rated power. Modifying these devices in any way including adding or removing components and accessories may change the audio output of the device and could result in PERMANENT HEARING DAMAGE.

Many countries have regulations defining the amount of noise that an individual can be subjected to during a normal workday. Compliance is application-dependent and standards vary. It is the **SOLE RESPONSIBILITY** of the end user to determine applicability and compliance to local hearing protection regulations.

Earphone Connection, Inc. strongly recommends that the radio is off before installation of audio accessory. Once audio accessory is securely installed radio can be turned on. Radio volume switch is recommended to set at low position and adjusted once radio is turned on.
